FLOORING SYSTEMS**

WOOD FLOORING

WE CAN WORK WITH ANY SURFACE.

ON-GRADE AND SCAFFOLD-ELEVATED WOOD FLOORING

Quality Event Flooring Systems offers expert-level on-grade and elevated wood flooring. This leveled plywood decking can be use with everything from tents to grandstands. We offer 3/4" single or multi-layer plywood event flooring, depending on service (drivable or non-drivable). Our plywood decking can be laid on 4x6" beams on grade or on elevated scaffolding engineered to any height specified by the client. All floorings meet ADA specifications, including stairs, ramps and railings as required.

Both on-grade and elevated wood flooring can be finished with carpet, vinyl or turf.

SCAFFOLD-ELEVATED WOOD FLOORING

Many attendees would be surprised to learn that the elegantly appointed dining and entertainment venue pictured at right is actually being held on a temporary surface. Our Quality Event Flooring Systems experts meticulously install engineered elevated surfaces able to withstand all sorts of traffic and loads, at heights specified by our clients.

First we build a precise level scaffolding system to support the flooring. Next a dense layer of 4x6" beams is placed on the scaffolding. Any obstacles such as trees or existing structures are planned around. Next, we affix 3/4" plywood to the beams for a seamless level surface. And finally, we professionally finish with carpet, vinyl or turf as the client desires.

QUALITY EVENT FLOORING SYSTEMS

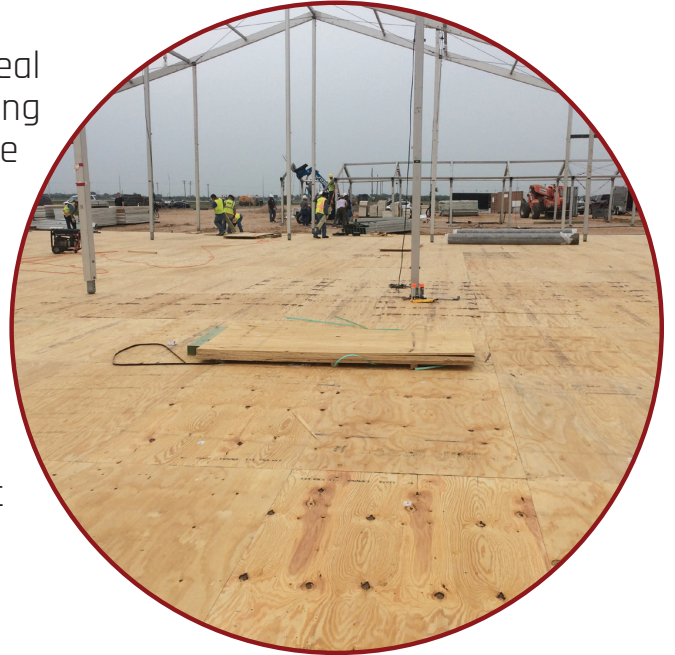

WOOD FLOORING

WE CAN WORK WITH ANY SURFACE.

ON-GRADE WOOD FLOORING

Outdoor events and gatherings rarely have ideal ground surfaces. Our Quality Event Flooring Systems experts can expertly install on-grade wood flooring systems on any site or terrain to ensure a safe, uniform and level surface for your project.

A system of 4x6" beams, shims and single or multi-layers of 3/4" plywood is used to create a stable and level floor, enhancing the project experience. We can then finish the surface with carpet, vinyl or turf as the client desires.

A MESSY SITUATION

Even muddy and rutted ground surfaces can be addressed with our on-grade flooring solutions.

A STABLE SURFACE

We use solid 4x6 beams and shims to make it stable and level.

FROM START TO FINISH

We install finishes on the flooring per client specifications.

FLOOR FINISHES

Quality Event Flooring Systems offers all types and styles of carpets, turf and/or vinyl products available. With proper lead times, we can match the customer's requested pantone carpet color to enhance the event experience. We offer customized logos as an added feature that personalizes the event as well. Floor finishes are installed professionally over plastic matting, wood decking or existing flooring ensuring a unique memorable event.
