SUPA-TRAC™

INCREDIBLY DURABLE.
DYNAMICALLY FLEXIBLE.

HEAVY-DUTY EVENT FLOORING AND ROADWAY SYSTEM

Supa-Trac turf protection mats are uniquely durable yet lightweight, making them the ideal matting solution for turf protection, tent flooring, or anywhere that heavy foot traffic and equipment will travel. Supa-Trac can support the weight of forklifts with pneumatic tires, light trucks, and vehicular traffic. Panels allow light, air, and water to reach the turf, keeping grass alive while protecting turf from being trampled by pedestrians or vehicles. Supa-Trac is suitable for natural and synthetic turf, indoors or out.

Supa-Trac is the most widely recognized design for temporary turf protection mats – covering some of the most valuable turf in the world. From pedestrian access to parking lots, military shelters and helipads, Supa-Trac capabilities have been extensively proven worldwide. It creates a contiguous, even, matting surface for level concert seating and walkways. Supa-Trac is incredibly durable and flexible which makes it ideal for short or long-term use. It is excellent as an artificial turf protection mat, or natural grass turf protection mat for stadiums as each panel allows light, air and water to the ground below.

FEATURES & BENEFITS

- Rapid deployment with a minimum amount of manpower
- 60% lighter weight than aluminum counterparts
- Easy to transport and store
- Can be deployed in rolls or slabs
- No special skills or special tools required for installation
- Capacity to support vehicles up to 3.5 tons per axle

APPLICATIONS / INDUSTRIES

- Exhibitions/stadiums
- Pedestrian access routes
- Construction pathways
- Light vehicle traffic (temporary parking lots)
- Concert flooring
- Events
- Tent flooring

SUPA-TRAC™

INCREDIBLY DURABLE.
DYNAMICALLY FLEXIBLE.

PERFECT FOR EVENTS AND ENTERTAINMENT VENUES.

With the ability to provide coverage for any area where heavy-duty flooring is necessary, Supa-Trac has been extensively proven in military applications, as well as domestic, construction, and events industries. Used daily by leading military forces, including use by all NATO countries, Supa-Trac is suitable for heli-pads and a variety of other deployment applications.

Supa-Trac is capable of dealing with all road going vehicles and extreme static loadings. This extraordinary system is ideal for these applications.

LIGHTWEIGHT YET DURABLE

We also offers ramp edging for straight-edged installation.
